

Credit Risk Management Solutions For Commercial Lenders

*Predictive Analytics Driving
Better Risk Decisions*

taking the
risk out
of small
business
lending

Corporate Overview

About PayNet, Inc.

PayNet is the leading provider of credit ratings on small businesses enabling lenders to achieve optimal risk management, growth, and operational efficiencies. PayNet maintains the largest proprietary database of small business loans, leases, and lines of credit encompassing over 22 Million contracts worth more than \$1.2 Trillion. Using state-of-the-art analytics, PayNet converts raw data into real-time market intelligence and predictive information that subscribing lenders use to make informed small business financial decisions and improve their business strategy.

PayNet's risk management solutions range from historic credit-reporting and automated credit-scoring to detailed strategic business reviews that include portfolio risk measurement, default forecasting, peer benchmarking and critical industry trend analysis.

The PayNet "Real-Time" Database

PayNet tracks lending and default data on more than 22 million small business loans compiled from their "real-time" proprietary database of \$1.2 Trillion in loan value from leading U.S. lenders which is updated monthly.

Small business data is gathered from one or more repositories consisting of term debt, loan/lease, trade and line of credit data. Data is uploaded monthly from a broad base of member companies, cleansed and aggregated for analysis, scoring and small business credit rating.

Unlike traditional data sources, PayNet's database derived from historic term-debt is a more reliable indicator of a borrower's payback performance through economic cycles.

Predictive borrower factors in PayNet's database include:

- Payment and delinquency history and patterns
- History of serious delinquency
- Years in business
- Years of borrowing
- Borrower practices
- Paydown of borrowings
- Borrower and borrowings size/magnitude
- Industry market segments including transportation, construction, agriculture, healthcare, and retail
- NAICS codes

Solve Your Critical Business Issues

PayNet's risk management solutions assist lenders to establish metrics for effectively communicating with management, regulators, auditors and investors.

These solutions can enhance every aspect of commercial lending ranging from profitability and risk management to credit decisioning procedures and operating cost-control.

A Multi-Industry Credit Decisioning System For Equipment Lending & Leasing

PayNet MasterScore examines crucial drivers that impact payback performance derived from PayNet's proprietary database of over 22 million contracts and \$1.2 Trillion in loans and leases.

PayNet MasterScore combines empirically-derived, statistically sound scoring methods with long term loan/lease data and the expertise of credit professionals to deliver a highly predictive score that outperforms trade-based credit scores.

PayNet MasterScore consists of a series of individual scorecards for categorizing and rating prospective borrowers in Transportation, Construction, Agriculture, Healthcare and Retail as well as four business-size segments which range from major corporations to home-based businesses.

The Portfolio Impact

PayNet MasterScore, along with its industry-specific scorecards, has proven to make credit-decisioning performance better, faster, and more profitable:

- More good deals approved while controlling risk levels
- Credit losses reduced by rejecting more bad deals...without reducing originations
- Operating costs lowered and decision-times accelerated with automated online scoring
- Profit margins improved with more accurate risk-based pricing

The Credit Decisioning Process

PayNet places the predictive-power of this scoring system and its proprietary database in the hands of the credit analyst to make credit-decisioning more accurate, faster, and more efficient.

Unlike any other decisioning tool, PayNet MasterScore identifies goods and bads based on PayNet's exhaustive analysis of over 100,000 actual defaults to pinpoint 57 key factors that cause deals to go bad. No credit analyst has ever had this level of predictive power...as no single analyst could ever possibly look at over 100,000 deals.

The Construction Score & The Transportation Score

For lenders that focus either on construction or on transportation lending/leasing, PayNet uniquely offers the Construction Score and the Transportation Score – the ultimate in credit-decisioning. Both of these scores are derived from PayNet's data-set of over 2 Million equipment term-contracts...and each score significantly outperforms scores based on short-term trade credit.

Portfolio Monitoring Solution To Identify Risk Across an Entire Small Business Loan Portfolio

Portfolio Risk Manager is a monthly subscription service that delivers powerful risk metrics on each commercial borrower. The lender's own data can be sliced and diced in unlimited combinations:

- Identify early warnings of delinquency and potential default (see example below)
- Prioritize collection-call queues
- Improve monitoring of special asset accounts with important updates
- Identify when a borrower is paying another lender before paying you
- Quantify risk weighted assets with an independent risk assessment
- Add strategic decision support for portfolio and segmentation analysis

The Account View, Included with Each Data Set, Presents Each Borrower's Current Risk Profile for Rapid and Effective Follow-up.

Calibrate PayNet's historic probability of default (HPD) to your risk ratings and identify migration from origination or last review

Use PayNet's proven probability of default (HPD) to objectively monitor and manage account activity

Identify changes in term loan balances and your relative position among other lenders to assist in proactive loan increases

Identify accounts defaulting on other loans before they become past due with you and mitigate or avoid more losses

Use external risk indicators, like other lender delinquency, to identify accounts requiring further review

Portfolio Risk Manager significantly enhances account management and portfolio analysis:

- Provides advanced warnings of borrower's cash flow problems indicated by delinquency with other lenders
- Provides objective analysis of changing borrower habits and risk migration
- Provides quantified and objective metrics which demonstrate comprehensive risk management for auditors, regulators, and board members

The Only Probability of Default Solution for Quantifying Credit Risk for Private Companies

PayNet AbsolutePD addresses the critical problems that lenders face in rating private-company portfolio risk:

- Efficiently and proactively managing small business portfolio risks is a constant challenge. Anticipating the direction of risk and positioning your small business portfolio for future risk is critical.
- Score and pool-based techniques that typically drive small business portfolio management are biased to historical trends. Forecasting risk with historic measures consistently lag actual default levels, and like a broken clock, are only right twice a business cycle.
- Bridging the gap between historic and future risk requires significant information gathering and analysis that are out of reach for most commercial portfolios.

PayNet reduces your lending risk by providing an absolute measure of credit risk at both the borrower and portfolio level on millions of small businesses for which financial statements are not available. PayNet's AbsolutePD product provides the only probability of defaults for private companies by geographic regions, industry sectors, and loan exposures.

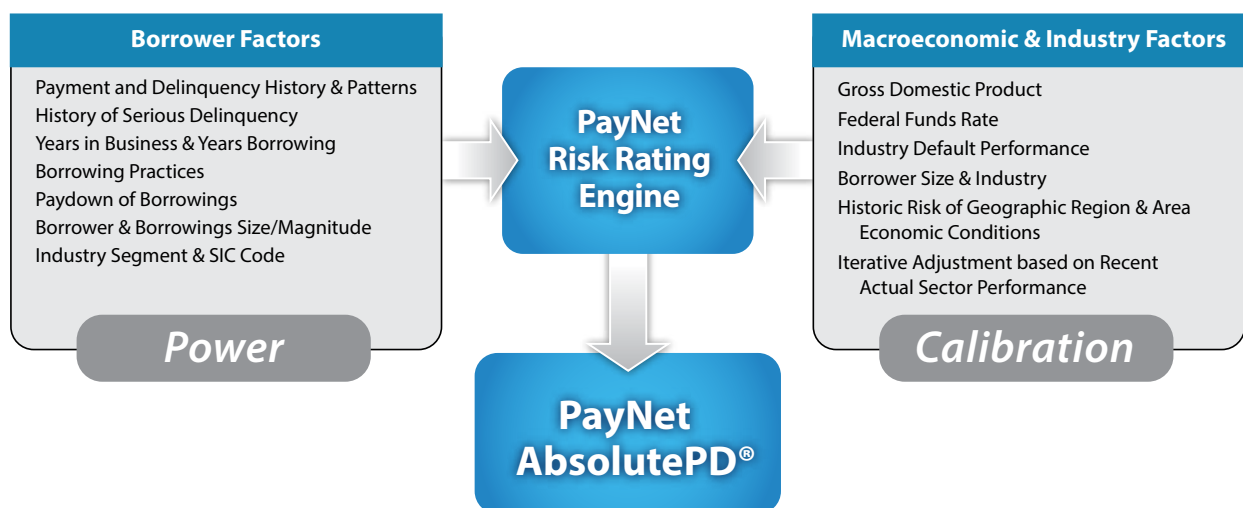

The PayNet AbsolutePD model, developed exclusively in collaboration with Professor Darrell Duffie (Stanford School of Business), combines current macroeconomic information with payment histories from PayNet's comprehensive proprietary database of 22 million financial contracts worth \$1.2 trillion to produce statistical estimates of probabilities of default up to eight quarters ahead.

PayNet AbsolutePD provides a consistent, transparent and objective loan management process mandated by management, auditors, regulators CEO's and investors.

PayNet AbsolutePD:

- Rates millions of private companies for which current and/or reliable financial statements are not available
- Aids in the improved estimation of loss reserves and determination of economic or regulatory capital
- Applies forward-looking credit ratings to enhance loss mitigation activities and identify areas for growth
- Provides an expected default rate for each obligor
- Provides quarterly forecast horizons up to eight quarters ahead

The Power of Traditional Models with the Calibration of Macroeconomic Factors to Predict Small Business Default Rates

PayNet Credit History Report

Definitive Borrower Information for Underwriting

The Credit History Report accurately delivers in-depth information and payback-performance of borrowers for the ultimate in informed and precise credit granting.

A core component of the Credit History Report is the highly-predictive PayNet MasterScore® for general-industry credit-decisioning or the specialized score for credit-decisioning within a specific industry.

Additionally, the report compiles borrower data that ranges from entity operating-information and lender/payback detail to delinquency history and lien/judgement summaries.

PayNet Strategic Business Review

Custom Evaluation of Portfolio Originations, Risk, and Operations

The Strategic Business Review delivers actionable solutions to optimize loan/lease portfolio performance by:

- Generating greater growth - identify significantly more high-return/low-risk market areas and commercial segments
- Setting more aggressive objectives - quantify market-share levels with greater confidence
- Optimizing resources - specify weaker procedures for improvement and streamline credit-decisioning processes

The lender's portfolio can be directly compared against the lender's competitive peer group for realistic and reliable evaluation:

- Measureable - Specific operating benchmarks are provided directly against 13 key performance categories and 61 critical performance-indicators
- Targeted - Meaningful comparisons are generated against equivalent lenders in the equivalent footprint, market, or product segment
- Extensive - Borrower data is pinpointed from PayNet's proprietary database of over 22 million term-debt contracts and \$1.2 Trillion in "comparable credit"

Case History – The Impact of PayNet's Strategic Business Review Showcased for a Major Commercial Lender

Situation	Lender Portfolio
Portfolio Size	\$14.0 Billion in term commercial contracts
Portfolio Objectives	Maintain double-digit profit growth rate and reduce losses
Portfolio Factors	Term contract average size – \$51,000 Booking rate – 50% Approval rate – 77% Auto-decisioning process
Portfolio Deficiencies Pinpointed By PayNet	Abnormally high delinquency rates – 5.5% Originations dominated by high-risk start-up companies – over 50% Unusual contract terms for less-established borrowers – 48 months Overly restrictive contract terms for established borrowers – 48 months
PayNet Recommendations	Reduce approval rate for start-up companies by 15% Reduce transaction term for start-up companies to 36 months Increase interest rates for start-up companies and very small businesses by 150 basis points Ease terms for more-established borrowers to 5 Years for companies in business at least 10 Years
Impact on Portfolio's Performance	\$40 Million increase in net life-cycle revenues: <ul style="list-style-type: none">• \$19 Million from increased interest rates• \$21 Million from easing of terms to established borrowers and enacting additional credit-procedure changes \$6 Million reduction in losses

Protection of Customer Data

Management is required to preserve the confidentiality of our customers' information as they would treat their own information. On behalf of our customers, management is committed to constant evaluation of appropriate levels of information security in keeping with our resources and responsibilities.

Since information is the essence of our business, this obligation is of the highest priority for PayNet. Management takes the position that, in the area of customer information, there is zero tolerance for compromise.

Additional information regarding PayNet's security and control environment is available upon request.
